

Home Buyers Plumbing Inspection

Drain Doctor Plumbing and Drainage "Home buyers inspection" reassures you that you should not be suprised by any major repairs or emergency leaks. Obviously no 100% guarantee can be given as it is only a report based on evidence at the time it was carried out.

Areas to be looked at include:

- All visible pipework and components (i.e without taking off panels, insulation, floorboards and covers) ranging from taps to coldwater storage tanks, kitchen sink wastes to central heating radiators.
- The central heating boiler will be turned on if power and gas is available.
- Radiators to be checked for heat and leaks.
- Thermostatic radiator valves will not be tested for functionality unless specifically requested (extra charge).
- The central heating boiler whilst working will be tested for carbon monoxide emmsions.
- No further inspection of the boiler will be made. Further inspection will be carried out if requested (extra charge).
